Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 11 of claim 4, claimed language "per se" renders claimed feature to be optional. Applicant may simply delete "per se" to overcome this rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

Claim 1 is rejected under 35 U.S.C. § 103(a) as being unpatentable over admitted prior art.

Under the title "Background of the Invention", page 1 and 2 applicant has admitted that an organic EL display comprising at least one electrode, a light emitting material filled inside an opening portion of a bank film, and another electrode formed on a substrate in format of pixel regions is known in the art.

Art Unit: 2879

The admitted prior art does not teach the claimed light reflection function to be imparted to at least side wall surface of the opening of the bank film. Here, it is noted that applicant is claiming a function or characteristic. Further, the admitted prior art discloses each and every physical feature/limitation of claim therefore the admitted prior art's device inherently functions similar to that of the claimed device.

Note to applicant,

Applicant may claim the above function/characteristic in positive term such as --- light reflection **material**--- imparted to side wall surface of the opening portion of the bank film to overcome the above rejection. Similar situation also appears in claim 4.

Allowable Subject Matter

Claim 2-3 are allowed since the prior art of record does not teach organic EL display device comprising a material layer having an optical refractive index which differs from optical refractive index of material of the bank film formed on at least a side wall surface of the opening portion of the bank film in combination with other features of claim.
